

**Think
Family**

**Work
Family**

**Everyone who works with children, young people, parents, carers or adults within a family should
Think Family, Work Family.**

This means recognising and responding to the needs of all family members in a holistic approach, by communicating with other practitioners working with the family and coordinating your efforts for the best outcomes.

For a One Minute Guide, the practice guidance, a protocol, and training information on the Think Family, Work Family approach, see the Leeds Safeguarding Children Board website:
